# About RASOI

 is more than just a POS system; it's your restaurant's digital backbone. Designed for cafés, bistros, and multi-branch restaurants, RASOI streamlines every aspect of your operations, from order management to customer engagement. With a sleek, intuitive interface, RASOI empowers your team to work smarter, serve faster, and make data-driven decisions that grow your business.

# Why RASOI?

In today's fast-paced food and beverage industry, efficiency, accuracy, and customer experience are critical. RASOI addresses these needs with a web-based POS platform that combines advanced functionality with a user-friendly design. Whether you manage a single café or a multi-location chain, RASOI simplifies operations, empowers staff, and enhances customer satisfaction.

## Multi-Branch Management

Centralized control for consistent service across multiple locations.

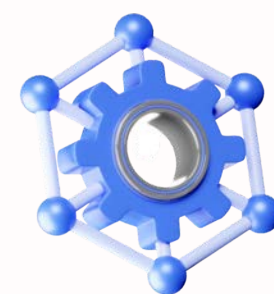

## Role-Based Access

Secure logins tailored for admins, servers, kitchen staff, delivery personnel, and customers.

## All-in-One Solution

Orders, inventory, billing, and analytics, everything in one platform.

## Seamless Integration

Works online, offline, and syncs effortlessly with online ordering platforms.

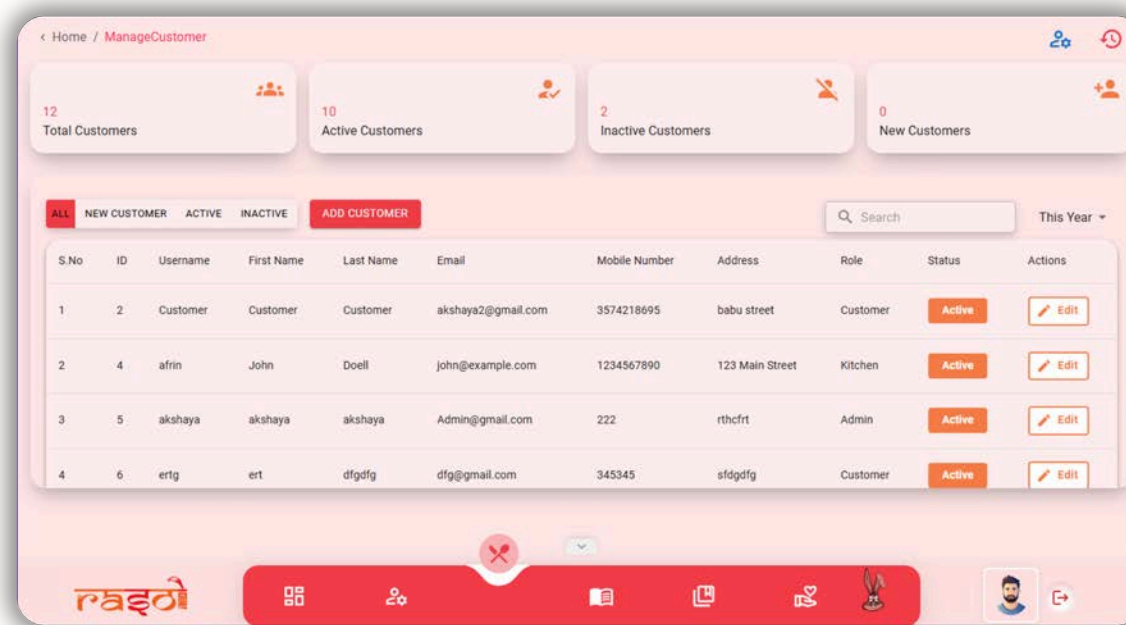

## Data-Driven Decisions

Real-time reporting and analytics help optimize inventory, sales, and performance.

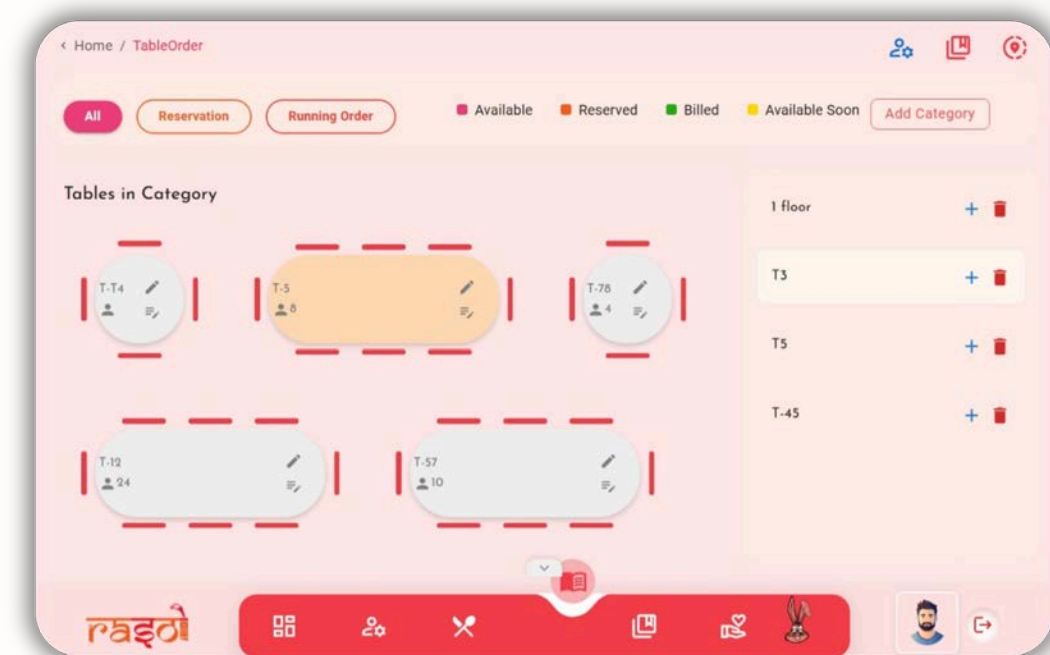

# RASOI Features

## Intelligent Admin Control

RASOI empowers your admin team with total control. Manage customer accounts, branch operations, staff roles, menus, and inventory, all from one dashboard.

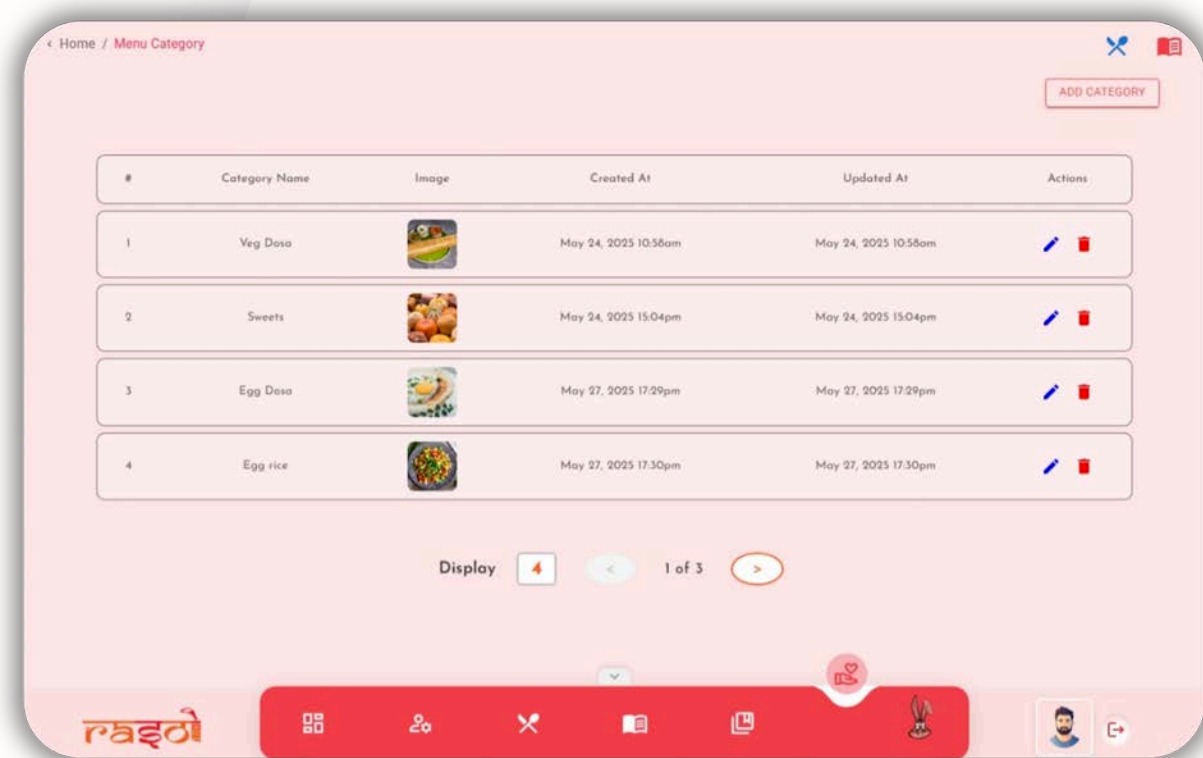

## Streamlined Customer Experience

Customers can pre-book, order for home delivery, and track their food in real time. They can rate meals, leave feedback, and stay engaged with personalized offers, all enhancing loyalty and repeat business.

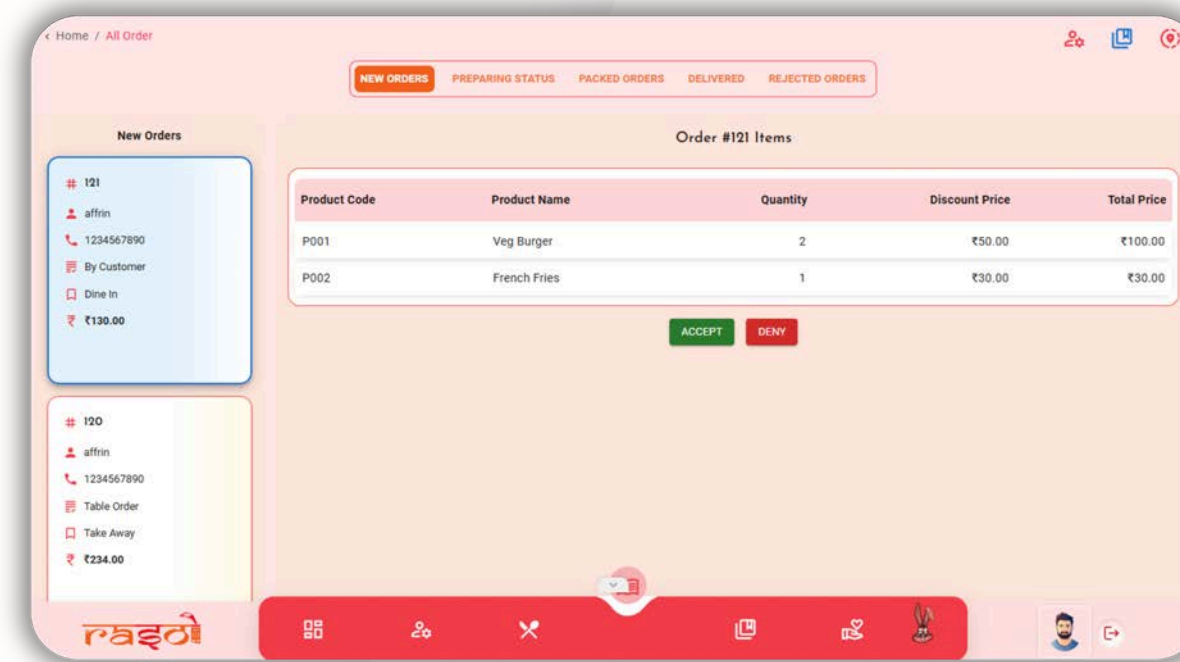

# raasoo Features

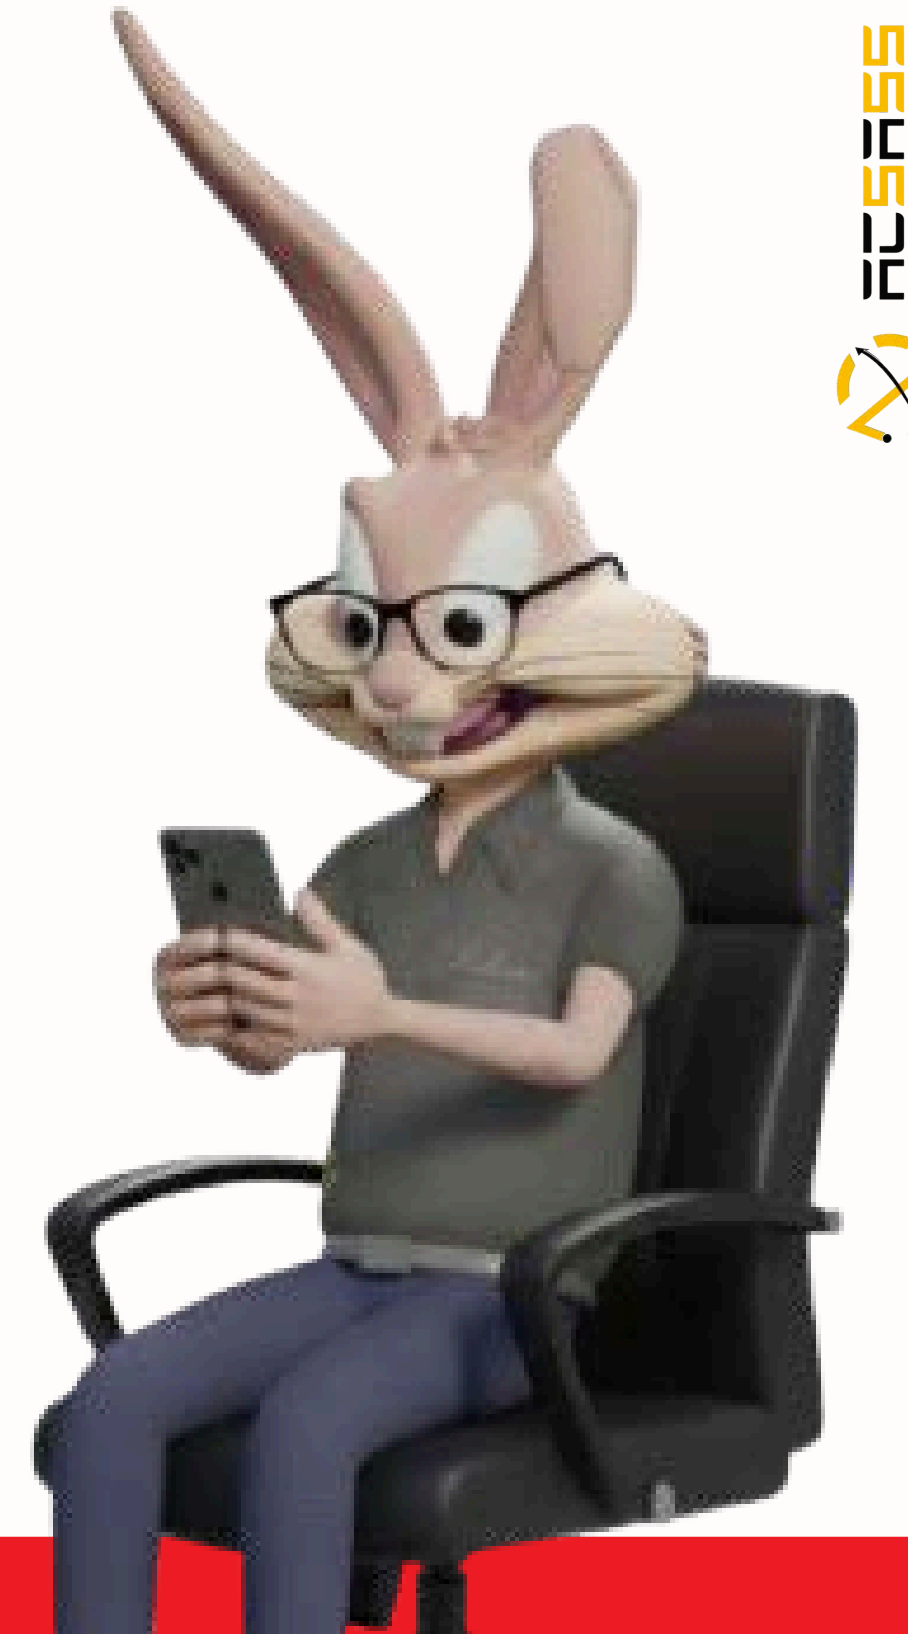

## Smart Kitchen Management

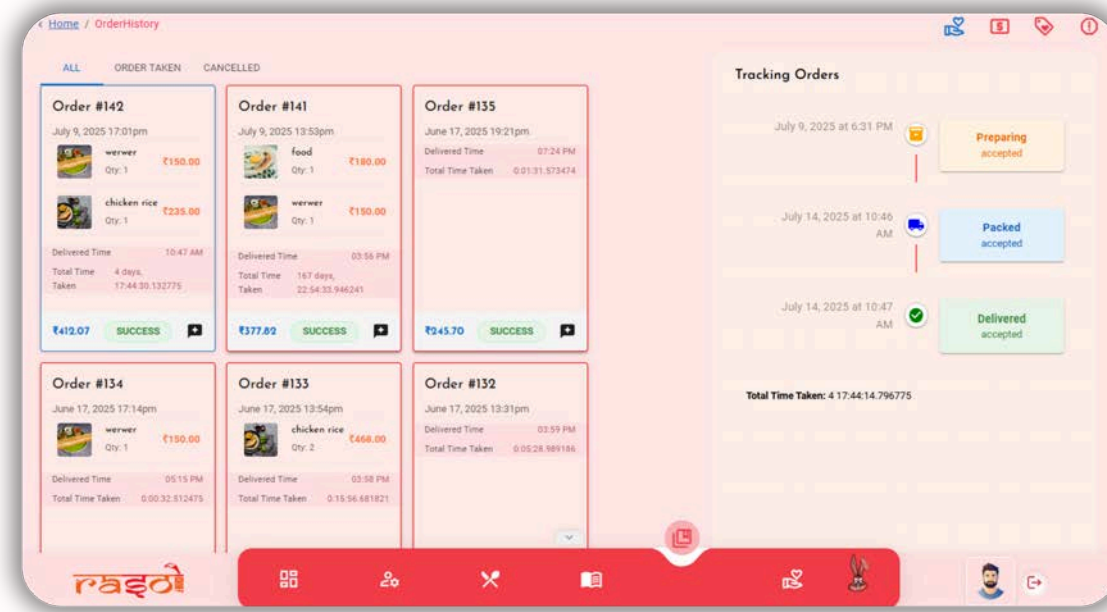

Kitchen staff can track orders, update menu items, and manage inventory with real-time precision. Communication is seamless, updates on preparation, delays, or completion are instantly reflected for both staff and customers.

## Efficient Front-of-House Operations

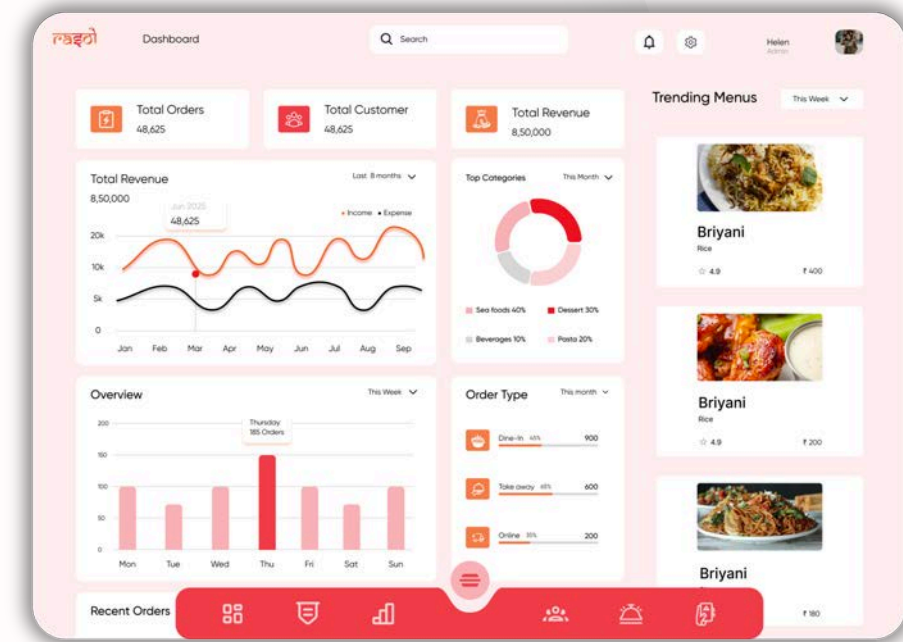

Servers and counter staff can take orders, update statuses, and generate bills with multiple payment options, including UPI, card, and cash. Checkout is smooth, fast, and reliable.

### Real-Time Delivery Tracking

Delivery personnel can update pickup and delivery status, providing customers with live notifications for transparency and improved service reliability.

### Advanced Analytics & Reporting

RASOI provides comprehensive analytics, tracks sales trends, monitors inventory levels, identifies high-performing menu items, and makes strategic business decisions with ease.

# Features

# Benefits That Transform Your Business

## Enhance Customer Satisfaction

Real-time updates and feedback tools delight your customers.

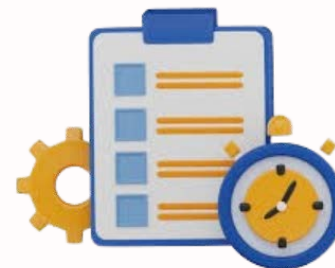

## Secure & Reliable
